Raptor Plus E-Guitar

The Peavey Raptor Plus sets an unprecedented standard in quality and innovation, with technological features never before available on a guitar in this price range! Solid body construction with new styling for better ergonomics and balance. Wide top pole piece single coil pickups for bigger string window with more focus. Peavey six-in-a-line headstock with ergonomic tuner placement and straight string pull. Five-way pickup selector and hum canceling in second and fourth positions. Master volume and tone controls. This Raptor Plus comes with HSS pickup configuration (Humbucker – Single Coil – Single Coil).

Peavey Audition Amp

The Peavey Audition is a killer practice amp with widely ranging dynamics and natural "grit" – just like tube amp! Peavey's exclusive TransTube technology truly creates the sound, warmth and "push back" of a tube amplifier through its patented solid-state design. The basic building blocks of the TransTube sound are the exclusive designs of the preamp and power amp. The preamp section tailors gain to meet the need for any amount of drive, from crystal clear to thick, smooth sustain. The power amp reacts just like a tube output section by responding to the preamp with natural compression that increases as the amp gets louder. The Peavey Audition features a switchable 2-channel design (Clean & Lead) as well as a Headphone Output for silent practicing.
